

CLOUD RINGS

What do you think the fog is made of? What clues are there to support your answer?

Try to create several rings, one after the other. How many were you able to make visible at the same time?

Try to create rings of different sizes. What do you need to do to make smaller rings?

If there were no fog and you pressed on the exhibit, do you think a ring would still be created? How might you test your prediction?
